Features & Benefits

Nova Libra has developed a leading Point of Sale (POS) solution for independent pharmacies by leveraging the strengths of Nova Libra and the expert specialization of our business partners. Nova Libra provides experienced, personal customer support to help your pharmacy succeed. Nova Libra utilizes the Microsoft Dynamics® Retail Management System to provide our customers with all the features of enterprise class software at a fraction of the cost. Hewlett Packard (HP) provides our Point of Sale customers with retail hardened long life equipment that comes with an exceptional 3-year warranty

- A complete management and inventory control solution
- Nova Libra's point of sale system automatically updates your product list with indicators for FSA eligibility. This list is available from SIGIS - ask your Nova Libra representative for more information.
- Nova Libra's system also identifies cards automatically to determine if they are FSA or HSA cards. Our solution automatically splits the transaction into eligible and non-eligible portions that make it easy for your employees and customers to process transactions while meeting IRS requirements.
- Nova Libra's cash register receipts have an "F" indicator to make it easy for all customers to easily determine what items are medical expenses.
- Nova Libra's system provides a reporting tools that allows its customers to easily deal with auditing tasks.
- Maintain tight control over products, shelf space, and suppliers
- Keep pace with retail giants through fast, flexible transaction processing
- Make better use of your employees' time and energy

Satisfaction and support are the cornerstones of our customer service policy.

Nova Libra

- Each POS lane runs independent of the other lanes, resulting in added reliability and data from each POS lane is automatically synchronized, so there is no need to buy a separate server
- The Microsoft® Retail Management System integrates with many popular accounting software programs
- The Microsoft® Retail Management System supports multiple tenders and online credit card processing
- Manage your staff, define security levels, track their hours with the built-in time clock, and generate cashier log reports
- Generate purchase orders, receive shipments, track inventory, create sales reports, and manage special pricing and promotions
- The Microsoft® Retail Management System includes the ability to create customized front shelf bin tags and labels
- The Microsoft® Retail Management System Headquarters is designed to provide store chains with a complete view of their business
- Headquarters offers flexible tools allowing data management of all your stores from one location
- Headquarters allows you to control and track inventory at each store and designate selected stores as warehouses where inventory can be received and redistributed
- The Microsoft® Dynamics Retail Management System Headquarters is available for multi-store locations. Headquarters allows multi-store inventory management from a single location.
